SUMMARY

Founder & Full-Stack Developer with a B.S. in Computer Science, specializing in full-stack web applications. Delivered production websites and interactive web apps for paying clients using React, Node.js, and RESTful APIs, owning project scope from requirements through deployment. Strong proficiency in JavaScript, SQL, and cloud deployment on Vercel. Seeking a software engineering role where end-to-end ownership and shipping speed matter.

AREAS OF EXPERTISE

Full-Stack Web Development	Auth/Access Control	Client Relationships	Relational Database Design
RESTful API Design	Cloud/Serverless Deployment	Project Scoping/Delivery	AI-Assisted Development

TECHNICAL SKILLS

Coding Languages	JavaScript/JSX Python Java SQL
Frontend	React HTML CSS Three.js Cytoscape.js
Backend & Databases	Node.js REST APIs FastAPI Prisma ORM PostgreSQL SQLAlchemy
Tools & Platforms	Git/GitHub Vercel VS Code Excel
AI Tools	Claude Code Codex

PROJECTS

Lead/Full-Stack Developer

Apr 2026 — Present

ASD Records | <https://www.asdrecords.net/>

North Wales, PA

- Launched a production content platform for an independent record label, enabling non-technical staff to manage artists, albums, lyrics, and video content through a custom admin portal built with React.
- Designed a relational Prisma/Postgres schema modeling many-to-many song–album placements, character-level lyric annotations, and per-artist admin access roles with JWT authentication.
- Streamlined media management by integrating Vercel Blob storage with a drag-and-drop reordering UI, cutting the manual steps needed to update cover art and video content.
- Eliminated shared-credential risk by implementing per-artist role-based access control with JWT auth, scoping each artist's admin permissions separately from the super-admin account.

Lead/Full-Stack Developer

May 2025 — Present

HeadInTheCloudsHaven LLC | <https://www.relatime.org/>

North Wales, PA

- Designed and built a full-stack web app that visualizes how relationships between entities evolve over time, combining a force-directed graph (Cytoscape.js + cytoscape-cola physics) with a snapshot-based timeline.
- Enabled offline-first usage by pairing cloud project storage (Neon Postgres + Vercel Blob) with a local ZIP save/load system, so the app works fully with or without an account.
- Kept a 20+ component graph editor maintainable and responsive by building a centralized state with React Context, including dynamic detail panels and per-type styling.

Full-Stack Developer

Jan 2026 — May 2026

UK HealthCare | <https://staffing-tool-uk.onrender.com>

Lexington, KY

- Delivered a production-ready staff scheduling application to UK HealthCare clinic managers as a team of four, owning the full cycle from requirements gathering through client-facing demos.
- Reduced manual scheduling effort for clinic managers by building a Gantt-style interface for assigning staff to time blocks, managing roles, and exporting schedules.
- Built a React frontend communicating with a FastAPI/Python backend via REST API.

EXPERIENCE

Founder & Freelance Developer

Apr 2026 — Present

HeadInTheCloudsHaven LLC | <https://www.headinthecloudshaven.com/>

North Wales, PA

- Founded a software development LLC and secured paying clients within the first month, handling contracts, pricing, and client relationships end-to-end.
- Delivered a production content management platform for an independent record label (ASD Records), from initial scoping and requirements gathering through launch and ongoing maintenance.
- Built and shipped full-stack solutions with React, Node.js, and RESTful APIs, deploying to Vercel with serverless architecture for zero-maintenance client hosting.
- Managed the complete project lifecycle across multiple engagements including feature planning, branding, iterative delivery, and post-launch support while also balancing usability, feasibility, and speed.

Front Desk Clerk

Feb 2024 — May 2026

University of Kentucky Housing

Lexington, KY

- Served as the first point of contact for residents, enforced facility policies and documented incidents with accuracy in a high-traffic environment.
- Provided consistent customer service and conflict resolution, built communication and problem-solving skills under pressure.

Retail Associate

May 2024 — Aug 2024

Kohl's

Blue Bell, PA

- Assisted customers across departments with purchases, exchanges, and Amazon returns in a fast-paced retail environment.
- Collaborated with team members on shipment processing, restocking, and maintaining presentation standards.

EDUCATION

University of Kentucky

Aug 2022 — May 2026

Bachelor of Science, Computer Science

Lexington, KY

- Minor in Mathematics
- Certificates in Artificial Intelligence (AI) & Cybersecurity
